## **TECHNICAL DATA SHEET**

---

### **AGENT FOR PVC & PU SOLE C6607**

---

#### **DESCRIPTION**

Surface treatment agent for cleaning and wiping EVA, PVC, PU soles and thermo surfaces before bonding with appropriate adhesive. It should be used at least 10-30 minutes prior to adhesive application.

#### **CHARACTERISTICS**

- Blend of valuable solvents with quick evaporation
- Specific gravity at 20 degree Celsius
- Distillation interval (degree Celsius)
- Easily flammable

#### **APPLICATION**

- Pour required quantity of primer in a small polythene or glass container and apply it on soles by using cloth avoiding skin contact.
- Allow 2 to 3 hrs for drying before applying adhesive.
- The primed surfaces should be protected from dust. Keep mixed solution of unused quantity in the original bottle.

#### **COLOURS**

Colourless

#### **STORAGE**

- Shelf life: 5 years if stored in well closed original packing in a dry and airy place.
- Keep from freezing and extreme heat.
