TECHNICAL DATA SHEET

Non-flammable Spray Adhesive F91

USES

Adhesive F91 is specifically formulated for one or two way bonding of polystyrene foam to various substrates. Also suitable for bonding many plastics to various materials.

ADVANTAGES

- Excellent spray characteristics
- Easy and economical to apply
- Non-flammable spray adhesive
- Safe to use on expanded polystyrene foam
- May be used as a contact adhesive or pressure-sensitive adhesive.

DESCRIPTION

Based on a carefully formulated blend of synthetic rubbers and resins in organic solvents. Designed to ensure application efficiency and maximum production speeds and will NOT cause attack on polystyrene foam or other sensitive substrates when used strictly according to directions. Adhesive F91 is normally used as contact adhesives, but is also suitable for use in many pressure-sensitive applications. Adhesive F91 is light yellow in color for easy visual inspection of spray pattern and coverage.

CHARACTERISTICS

- | | |
|---------------------------|---------------------------------|
| - Form | Sprayable, low viscosity liquid |
| - Colour | light yellow |
| - Drying time | 10 – 30 minutes |
| - Flammable | non flammable |
| - Application Temperature | Above 15°C |

APPLICATION

Remove the dust from the surfaces previously prepared for gluing, apply once or twice the adhesive (according to the absorbing power of the material), and let dry, then join the two parts and press

STORAGE

Shelf life: about 1 year if stored in well closed tins at 15 – 25 deg Celsius.
